MADE IN ITALY

Chi siamo - Who we are...

 Con oltre 30 anni di esperienza, a partire dai noti marchi italiani GASCO e KSK, Adam Pumps nasce nel 2010, a seguito del Management Buy-Out di Tuthill Italia Spa, Filiale italiana del gruppo americano Tuthill Corporation, leader mondiale nella produzione di pompe e contatori per benzina.

La parola chiave dell'Azienda è Qualità.

Qualità dei prodotti, interamente concepiti e progettati dai nostri responsabili tecnici attraverso le tecnologie più avanzate, nonché testati individualmente secondo i più severi standard qualitativi.

Tutta la produzione e l'assemblaggio avvengono presso il nostro stabilimento di Campogalliano nei pressi di Modena, per questo ogni prodotto Adam Pumps è 100% Made in Italy.

Qualità del servizio e totale soddisfazione del cliente. Il nostro processo produttivo segue le linee guida del cosiddetto "Lean Manufacturing", garantendone così la massima efficienza, mentre la filosofia del "Continuous Improvement" ci rende dinamici e sempre aperti alle richieste del cliente.

Adam Pumps was founded in 2010 following the management buy-out of Tuthill Italia Spa, the Italian branch of Tuthill Corporation, world leader manufacturer of pumps and meters for gasoline. Prior to Tuthill, the company, had long been a specialist for the diesel transfer solutions as GASCO and KSK, giving us over 30 years experience.

At Adam Pumps we focus on quality.

Quality of the products, all of which are conceived and designed at our technical department through the most accurate technology and individually tested according to the most stringent parameters.

Manufacturing and assembling are all carried out at our factory in Campogalliano which means our products are Made in Italy.

Quality of the service and complete customer's satisfaction. Our Lean Manufacturing protocol guarantees efficiency and fast response, our Continuous Improvement philosophy makes sure the customer's requirements are always met and fulfilled.
